Each year, there are more than 350,000 out-of-hospital cardiac arrests in the US. And seventy percent of those occur in the home. The only chance for survival is quick and effective Cardio-Pulmonary Resuscitation (CPR).

If you are called on to give CPR in an emergency, you will most likely be trying to save the life of someone you love: a child, a spouse, a parent or a friend. This could be the most important class you ever attend.

RSVP is recommended. Please wear comfortable clothing.
